C: Format for Midterm Review Report

The NPCU/SCO will prepare a midterm review for the HOPE-PHC program, documenting project milestones (initial outputs and achieved outcomes), progress towards achieving the results framework, intervention areas, and reporting on the IPF component of the program. The mid-term review will be a joint exercise engaging partners supporting the Program, and prepared in collaboration with the World Bank task team at the end of period two and the commencement of period 3 of the program. This will be combined with the Joint Annual Review for that period.

Annex 2 - TA Component: Implementing Agency/Partner Annual Work Plan Template

All work plans to be consistent with the following structure

1. Summary work plan and budget [approx. 5 pages]

1.1. Summary description of the role and scope of the implementing agency/partner in the HOPE-PHC program [1/2 to 1 page. The description should be consistent with the Strategic Framework for capacity-building to the state in the POM, along with the matrix of content areas, modalities, and implementation agencies.]

1.2. Summary description of each set of activities: [Use this table format for each separate activity]

ACTIVITY #1	INSERT ACTIVITY NAME
Activity Objective	Insert learning objective of the activity (or the sub-activities together)
Contribution to DLIs	List which DLI(s) the activity (or the sub-activities together) supports
Sub-activity #1.1	Insert sub-activity name
Expected Beneficiaries	Describe which States, MDAs, and staff level Estimate number of civil servants to be trained
Modality	Choose one of the following categories: - Curriculum-based class learning - Curriculum-based e-learning - Guidelines/knowledge notes, tools and templates - Technical workshops - Customized just-in-time advisory services to individual states - Peer learning forums - State exchange visits - State reform experience studies - Other
Where	Central (Abuja), regional, state-level
How implemented	Describe if internal staff or external consultant or firm will be implementing
# total outputs in 2025-2029	Insert total indicative outputs, for example, number of guidelines, workshops, learning forms.
[2025] specific outputs	Estimated outputs for next year
Sub-activity #1.2	Repeat as above for all sub-activities

1.3. Summary of the budget by year and activity Please utilize this table format, which should be created from the summary sheet in the XLS budget file. The upcoming year is regarded as an estimate and serves as the basis for disbursement. Subsequent years are

suggestive and will be revised in next year's work plan and budget.

Naira million	2025 Estimate	2026 Indicative	2027 Indicative	2028 Indicative	Total
Activity #1					
Activity #2					
Activity #3 etc.					
TOTAL					

1.4. Summary of management, activity monitoring, reporting, and FM arrangements

[1/2 page max]

2. Detailed Work Plan [10-20 Pages]

The structure of this section is flexible, but the content should provide more details about the activities in the summary and how the activities will be implemented. Please follow the same activity numbering as in the summary work plan.

3. Detailed management and reporting arrangements (2-3 pages)

[Provide a description of project management, management oversight, activity monitoring, and reporting arrangements.]

4. Fiduciary [2 pages]

Provide a description of FM arrangements and resources deployed to fulfill FM requirements. Implementing agencies (PCU, DMO, PSIN, OGP) that directly receive funds from the Bank should include the standard table of FM reporting requirements below, which they must all meet.

Table X: Summary of key reports required from implementing agencies

Purpose	Report	Time and Frequency
Planning and budgeting	Annual workplan (AWP) and annual budget submitted to the World Bank and PCU for review and approval	Annually: December 2025, October 2026, October 2027, October 2028

Funds flow/Disbursements Accounting and financial reporting	Unaudited Interim Financial Report (IFR) (before regular withdrawal applications); (i) Sources and uses of funds (ii) Uses of funds by project activities (iii) Expenditure forecasts for the subsequent six months. (iv) DA reconciliation statements attaching the relevant bank statements	Quarterly, submitted within 45 days after the first full quarter of the calendar year post program effectiveness. For example: if program is effective in November 2025. The first IFR will cover November 2026 to March 2026 and be due before mid-May 2026
Internal controls.	Quarterly internal audit reports prepared by internal auditor will be submitted to IDA within 45 days of each fiscal calendar quarter.	Quarterly, submitted within 45 days after the first full quarter of the calendar year post program effectiveness.
Audits	Audited annual financial statements	Annually, starting June 2025 for 2026

Notes: The standard format of the unaudited Interim Financial Report (IFR), Annual Financial Statement, and External Auditors' Terms of Reference for financial audits will be provided by the World Bank task team to all implementing agencies by program effectiveness.

5. Detailed budget is in the attached XLS file

Please ensure the detailed budget XLS file contains the following:

- Is structured by activity
- Is consistent with cost guidelines and macro assumptions, such as inflation, provided by the Bank
- Contains a summary worksheet that produces the summary budget table for the work plan
- The next year is an estimate; future years are treated as indicative
- Procurable line items are identified

Annex 3 - 2024 TA Support Areas Report

Based off recommendations from the State engagements & learnings from roadshows, we are starting with the following as we expand the menu for a bigger pool based on State/Institutional needs outlined below:

Requirements/TA needs

1. Programmatic Capacity for HCP to deliver on service delivery. Operational support - Financial and TA
2. Strong analytical, and problem-solving skills including using systems thinking to troubleshoot and proffer solutions to health systems performance-related issues, and appropriately plan and allocate resources
3. Data management & M&E capabilities at the state level to track indicators, develop scorecards, and facilitate share with the states
4. Strong data systems, tools, and M&E at the state and national level to enable tracking and reporting of core indicators, prepare state-level reports, and formulate potential interventions to advance health outcomes
5. Leadership & Management
6. Health financing & Resource Coordination
7. Health Planning

Immediate TA Need and Short-term Priorities for the TA Pool:

S/N	TA priorities	Technical Partner	Completion Status	Date
1	CEmONC/BEmONC Service Readiness Assessments: Conduct assessments to ensure the readiness of our services.	JHpiego	Completed	
2	TA for AOP: Provide Technical assistance for deployment of Annual Operational Planning to ensure alignment.	IPs supporting DPs in the DPG-H	Completed	
3	SWAp Desk Officers' Capacity Building: Enhance the capacity of SWAp desk officers to improve stewardship at the State level.	Abt Associates	Completed	

4	Strengthen Problem-Solving, Data Management & M&E Capabilities: Build capabilities at the State level to track indicators, develop scorecards, and use data for informed decision-making.	TBD	TBD

Progress Update and Key Developments: 2024

Here's a summary of the key updates on the State Capacity Assessment (SCA) tool development, review, and next steps. Regarding the State Capacity Assessment, we've made significant progress. Activities 1-3 have been completed, through the USAID funding using Oxford Policy Management (OPM) as the Implementing Partner. However, as of January 2025, OPM's contract ended, and USAID has since partnered with SOLINA to conduct the pilot assessment in the three (3) states through an ongoing facility with Abt Global.

These updates highlight key progress and next steps for implementing the SCA tool, particularly in light of the USG funding suspension. Our goal is to ensure the process remains on track and provides actionable insights for conducting the SCA.

1. Development and Review of the SCA Tool:

- The SCA tool development followed a collaborative process with consultations involving multiple stakeholders, including FMOH, USAID, WHO, UNICEF, NPHCDA, and various state health officials. Key workshops were held to review and refine the tool, focusing on simplifying terminology, improving its structure, and adapting it to Nigeria's context.
- The tool assesses health system capacities across seven domains: financial management, human resources for health, leadership and governance, health management information systems (HMIS), supply chain management, public health emergencies, and community health services.

Workplan for Developing SCA

#	Deliverable	Notes	Due Date	Status
1.	Protocol for the SCA submitted for expedited ethical approval to the national health research ethics committee and submission letter	We understand there is a draft protocol and application under review and that Dr. Cherima has a strong connection at the NHREC and believes we can obtain this within a couple of weeks	November 15	Protocol developed and shared for final review. Application letter also finalized

2.	Draft public perception survey report (revised version of the one sent by NOI)		November 15	
3.	Final public perception report	Incorporating the feedback received by November 22	November 29	
4.	Final draft of SCA tool for piloting	Edited by Emily and including any revised technical content from the technical domain meetings the weeks of Nov. 11th and 18th, and the UNICEF, GAVI and World Bank meetings	November 29	All reviews with NPHCDA and USAID IP done for Financial Management, HRH and L&M. The plan was to have for the remaining domains spread beginning Monday.
5.	Organize 3 one-day meetings for review of the SCA tool, one each with UNICEF, GAVI, and World Bank	Ideally after the domain meetings are complete (22nd), but timing may clash with National Council of Health (NCH) meeting, so some of these meetings may be needed next week, or after the NCH	November 22/29	To invite the partners for the review. Venue of the meeting to be determined.
6.	Operational plan (including technical notes for calculating indicators/data exchange to MSDAT) based on OPM's work to-date for setting up an ODK database using survey CTO and integrating data into the MSDAT platform managed by eHealth4everyone		November 22	
7.	SCA tool programmed in ODK	Would like to have the programming that Babatunde has been working on and developed a prototype for, even if he is unable to complete it by November 29	November 29	
8.	Draft SCA training manual and PPT slides	Would like the training manual to be updated based on the final draft tool	November 29	Manual ready, to be finalized based on the last version of the tool

9.	Spreadsheet of all consultations for the SCA Tool, including dates, list of participants and technical consultants, contact details and organizational affiliations and roles, and dates they were engaged		Nov 29	
10.	Spreadsheet of interested people who have been shortlisted for the state assessors		Nov 29	

2. Pre-Pilot Testing:

- Several pre-pilot sessions were conducted in collaboration with NPHCDA, covering different domains like HRH, public health emergencies, financial management, and leadership and governance. These pre-pilots helped refine the tool and ensured it aligned with Nigeria's health system structure.

3. Consultative Stakeholder Engagement:

- The SCA tool was refined based on feedback from key consultations, including a co-creation workshop and a review meeting with development partners. Recommendations included reducing the number of questions for better assessment, adding an additional domain on public health security, and ensuring alignment with national health priorities.

4. Pilot Testing and Implementation Plans:

- The next step involves pilot testing in three states (Ogun, FCT, and Jigawa) between January and April 2025. This will involve a combination of field surveys, data analysis, and review of the TA needs across 7 domains, including supervisor from the National and State government.

5. Data Collection and Analysis:

- Data collection will be carried out using Survey CTO, with assessors selected based on specific criteria, including experience with Nigeria's health system, proficiency in digital platforms, and communication skills. The assessment will include surveys at various levels—state, LGA, CeMONC sites, PHC, and community—ensuring a comprehensive analysis of health system performance.

6. Next Steps:

- A workplan for the SCA activity and milestones is finalized and attached, with a focus on analyzing data, developing a costed TA implementation plan, and refining the tool for national rollout. A detailed data validation and cleaning process will ensure the accuracy of results. The final deliverables will include an analysis report, a finalized TA plan, and dissemination of findings

GUIDELINES FOF FUNDS AVAILABILITY

MINISTRIES, DEPARTMENTS AND AGENCIES (MDAS) IMPLEMENTING PRIMARY HEALTHCARE PROVISION STRENGTHENING PROGRAM POLICY PURPOSE AND SCOPE

This document establishes the Funds Release Policy for the Ministries, Departments and Agencies (MDAs) implementing the Primary Healthcare Provision Strengthening Program (HOPE-PHC) in X State.

OBJECTIVES

The objectives of the XXSG NHSRII and the HOPE PHC Funds Release Policy include:

- A. to facilitate timely availability of funds to MDAs implementing NHSRII and HOPE PHC program, allowing for the execution of the state annual operating plans (AOPs).
- B. improved predictability and availability of funds to MDAs implementing NHSRII and HOPE PHC program for better planning and program execution.
- C. expedited processing of funding requests to MDAs implementing NHSRII and HOPE PHC program

DEFINITION OF TERMS

1. **Consolidated Revenue Fund (CRF):** This is the fund where all government revenue accrues whether from taxes, Federal Government allocation or other sources. All government expenditures are made from this fund except for exceptional items made from contingency or special accounts meant for the purposes stated. All expenditures from this fund are made as appropriated by the State House of Assembly.
2. **State:** Means XXXX State of Nigeria created by virtue of section 3 of the 1999 Constitution of the Federal Republic of Nigeria (as amended).
3. **XXXX State Government (XXSG):** Means the executive arm of XXXX State Government.
4. **XXXX State House of Assembly (XXHA):** Means the legislative arm of government created by virtue of section 90 of the 1999 Constitution of the Federal Republic of Nigeria (as amended).
5. **MDAs implementing NHSRII and HOPE PHC program in the state:** Indicate the relevant MDAs here {XXXX}.
 - A. It is the policy of XXSG to release funds from the state TSA to MDAs implementing HOPE PHC program within 14 days of request.
 - B. The funds to be released will be for implementing DLI activities under the approved costed Annual Operational Plan (AOP) of the health sector. All expenditures must also be in line with the approved AOP.
 - C. Commissioners of Health, in their capacities as Chairpersons of the BHCPF State Oversight Committee will oversee the preparation and approval of the AOPs, consistency with the overall development plan of the state, and ensure that such plans are also shared with their Governors for their consent.
 - D. Expenditures of the MDAs implementing HOPE PHC program must be in line with their approved Annual Operational Plan.
 - E. Funding requests by the MDAs implementing HOPE PHC program will follow established state processes for sector expenditure requisition and approval. The requests will clearly identify the relevant activities in the approved costed plan AOP and relevant supporting documents as the basis for requisition.
 - F. To qualify for the next DLI achieved, the state shall provide evidence of funds released to the operational accounts of the implementing MDAs to the IVA for verification and confirmation.
 - G. Monthly returns of all fund's utilization along with supporting documentation must be made to the Final Accounts unit of the Office of the Accountant General of the State. Copy of the monthly funds' utilization report shall also be submitted to the Chairman of the BHCPF State Oversight Committee.

Approved

HE Governor

The Coordinating Minister of Health and Social Welfare,
Federal Ministry of Health,
Federal Secretariat, Ahmadu Bello Way,
Central Business District,
FCT-Abuja.

**RE: EXPRESSION OF INTEREST TO PARTICIPATE IN THE HUMAN CAPITAL
OPPORTUNITIES FOR PROSPERITY AND EQUALITY (HOPE) HEALTH PROGRAMME**

I bring your esteemed greetings from the government and good people of X State.

I write to acknowledge receipt of your letter No. HMH/ABJ/541/1/31 dated 13th September, 2024 on the above subject and to notify you of our readiness and willingness to participate in the Human Capital Opportunities for Prosperity and Equality (HOPE)-HEALTH Programme. We believe that the programme will assist to fast-track improvements in the health outcomes in X State and the country in general.

By our participation in this programme, we are committed to undertake and abide by the conditions outlined that would guide the successful implementation of the programme in the State. Currently, X State has prepared the Annual Operational Plan (AOP) for year 2025 in line with the Sector Wide Approach (SWAp) Reform which is being aligned with the 2025 State Appropriation. Also, X State has adopted the fund release policy as evidently contained in Appendix-I attached with this letter.

Hon. Minister, I believe that by working together in this regard, the State would be able to utilize the opportunity provided under HOPE-PHC to improve health outcomes which would, no doubt, support the State Government's commitment to achieving healthcare delivery targets.

I thank your esteemed self for the opportunity offered to collaborate with you and other health partners towards tackling the challenges of health outcomes that have confronted the State and indeed the country at large.

Please accept, as usual, the assurances of my highest regards.

Executive Governor of X State.

Annex 5 - Enhanced Accountability Framework

1. Based on the findings from the comprehensive FM review that focused mainly on the soft costs associated with workshops, training, travel, and operating expenses in the participating states, implementing entities, and NPCU, we are establishing an improved accountability framework for the project (Original & AF). This framework aims to ensure that funds are utilized efficiently and effectively for their intended purposes, thus achieving value for money.
2. The objectives of a strengthened accountability framework include, to:
 - Develop and implement a robust improvement in accountability for the use of project funds that will assist in achieving the expected outcomes for various funded programs.
 - Provide guidelines on the minimum requirements to comply with for workshops, training, and related activities.

Specific accountability framework for training, workshops, study tours, etc.

3. An enhanced accountability framework is in place for expenditures in the areas of training, workshops, study tours, etc., as follows:
 - At the beginning of each fiscal year, a separate training summary plan shall be developed and shared with the TTL for review as part of the annual work plan.
 - All training, i.e., local and international, would require prior clearance from the Bank's TTL before it is undertaken. The request for clearance should, at a minimum, include the following:
 - A demonstrated linkage between the rationale for the workshop, training, etc., and the Development Objective of the project will be established.
 - Annual Work Program (AWP) to which the activity falls shall be identified.
 - The number of trainees, their functions, and modes of selection will be defined. This should also include how many times, during the past 18 months, the listed trainees have benefited from training.
 - The number of years until retirement from service for each of the proposed trainees.
 - The process used for selecting a training provider, and if foreign training is involved, the rationale for not proposing local training, is to be provided.
 - Training prospectus and reference to the benefits of the training to be provided; and
 - Provision of the detailed cost of the event: if local training/workshop/sensitization,

the following additional information needs to be provided - viz: i) venue for the event, ii) how the venue was or is proposed to be selected, iii) venue rental, refreshments/lunches, per diem, and transportation costs (air or land travel costs per trainee).

- No residential local training program will be allowed where the venue is located in the locality of the trainees; the preferred choice of locality should be the location of the majority of officials to be trained.
4. For activities financed via the World Bank, only after the above submissions and the Bank's Prior Review and No Objection will expenses be committed and become eligible for financing under the project.
- Each PIU will ensure that a formal process of accountability is established for training expenditures, which will include:
 - Submission of the training report by the trainee.
 - Certificate of Attendance from the training institution.
 - Relevant travel certifications, such as air tickets, boarding passes for air travel, hotel bills, etc., are essential.
 - Consistent with the government's cashless policy, air tickets shall be procured directly from the airline through electronic payment or check (no cash payments will be allowed); and
 - Similar practices will also be applied to payments to vendors and tuition fees for training providers.
 - A reduced amount of DSA will be paid where training /workshop organizers provide meals and accommodation. Before a new advance is granted, a cash advance granted to Project staff must be retired by concerned staff within the timeline specified in the PIM. Where retirement of an advance is past due, an automatic payroll deduction of the unretired amount should be effected. To keep track of cash advances disbursed, an Advances Register shall be maintained as a control measure.
 - The Project Internal Auditor shall include in their work program periodic random audits of travel advances and their retirement, as well as a review of the training/workshop conducted. A report of this review shall be provided to the PC and the Bank TTL.

Annex 6 - HOPE-PHC Independent Verification Agent Terms of Reference

1. HOPE-GOV Background

The Federal Government of Nigeria, in partnership with multiple financiers, has established a series of multi-year (2025-2029) initiative to enhance financial, human resource management, and basic services (health and education) in Nigerian states. This initiative is known as the Nigeria Human Capital Opportunities for Prosperity and Equity (HOPE) Program (“The Program”).

The Program development objective is to support the Federal Republic of Nigeria in strengthening financial, human resource management, and service delivery in the basic education and primary healthcare sectors. The Program will finance activities through two main components: (i) a Program for Results (PforR) for an estimated US\$1 billion for HOPE GOV and HOPE-PHC and (ii) a technical assistance (TA) component utilizing the Investment Project Financing (IPF) instrument, totaling US\$70 million. This Program is expected to span four years. It became “Effective” in XXX and is expected to be completed by December 2029, which is the Closing Date for the financing received from the World Bank. The PforR will assess states’ performance regarding financial, human resource management, and service delivery reforms for governance and primary health care services over four fiscal or calendar years: 2025-2029. Capacity-building initiatives will be implemented concurrent to the Program period.

The Program will support participating states in implementing a strategic set of reforms from two government programs: (i) the Universal Basic Education (UBE) Program established by the Universal Basic Education Act of 2004 (UBE Act), now being refocused through the new Universal Basic Education Roadmap (UBER), 2021 – 2030; and (ii) the Basic Healthcare Provision Program established by the National Health Act of 2014, now being implemented through the National Health Sector Renewal Investment Initiative (NHSRII), 2024 – 2028. Ex-ante, the Program is open to all states for participation. The PforR component will provide performance-based financing to states. To access the PforR financing, every state must meet the annual eligibility criteria: the publication of annual budgets, audited financial statements, and quarterly budget performance reports and sign the fund release policy committing resources earned as additional financing for the sectors. States meeting the eligibility criteria will receive performance-based financing based on their achievement of a pre-agreed set of results/disbursement-linked results (DLRs). The results/DLRs support increased availability and effectiveness of financing for basic education and primary healthcare service delivery, enhanced transparency and accountability for basic education and primary healthcare, improved recruitment, deployment, and performance management of basic education teachers and primary healthcare workers by federal, state, and local governments, and strengthened state debt sustainability.

Under the TA component, a comprehensive set of capacity-building activities using different modalities will be conducted to support Nigerian states (up to 36 states) in achieving the results/DLIs. Capacity-building activities will commence for the states once the program is effective, starting in 2025 and continuing until the end of 2029, although the majority are expected to be completed by the end of 2028. The Program Secretariats in the Federal Ministry of Budget and Economic Planning (FMOBEP) and the Federal Ministry of Health and Social Welfare will coordinate and oversee the delivery of capacity-building activities by implementing entities.

The independent verification firm will be selected in accordance with the procedures set out in the World Bank's Procurement Regulations for IPF Borrowers (September 2023), "Guidelines on Preventing and Combating Fraud and Corruption in Projects Financed by IBRD Loans, IDA Credits, and Grants" (revised as of July 1, 2016 available at the World Bank website: <https://policies.worldbank.org/sites/ppf3/PPFDocuments/Forms/DispPage.aspx?docid=4005&ver=current>), and other provisions stipulated in the Financing Agreement. The national procurement procedures will apply to the project where necessary.

2. Proposed Assignment

The Program Coordination Units (PCUs) of the HOPE-GOV and HOPE-PHC seeks to hire a project management firm to carry out a series of specific activities designed to enhance states' capacities to meet their results and Disbursement-linked Indicators (DLIs) from 2025 to 2028. The independent verification firm's activities will supplement the work of other implementing partners by providing additional learning modalities and coverage of DLIs, as detailed in the DLI matrix for both programs.

3. Scope of Services and Key Tasks

The PCUs seek the services of a firm to undertake the following specific activities under the proposed assignment:

Procurement services under the independent verification firm:

The project management firm's responsibilities include managing the related procurement (including individual consultants and consulting firms) required for the firm to deliver the activities agreed upon in the contract.

- Any procurement process undertaken by the independent verification firm in executing the contract will be carried out in accordance with the procedures specified in the 'World Bank's Procurement Regulations for IPF Borrowers (September 2023), "Guidelines on Preventing and Combating Fraud and Corruption in Projects Financed by IBRD Loans, IDA Credits, and Grants" (revised as of July 1, 2016), and other provisions stipulated in the Financing Agreement. The national procurement procedures will apply to this consultancy as necessary.
- An experienced procurement consultant, familiar with the World Bank Procurement Regulations for Borrowers, will be engaged to support the implementation of the

- procurement activities that the independent verification firm will undertake.
- When the project is launched, procurement-related staff in the independent verification firm will receive a training workshop on the Bank's Procurement Regulations and the Bank's System Tracking of Exchanges in Procurement (STEP).

4. Expected Deliverables and Reporting Requirements

The assignment is expected to start in Q1 of 2025. During the assignment, the selected firm is expected to deliver the following:

- A detailed roster of result verification work plan for 2025, including the specific outputs/deliverables to be completed by the end of 2025 (within four weeks of contract signing).
- A kick-off workshop to brief key stakeholders, including the Bank and other implementing agencies providing result verification activities (within 4 weeks of contract signing).
- Further annual work plans and budgets should be developed and submitted to the PCUs for approval no later than two months before the start of the calendar year; that is, October 2025 for 2026, October 2026 for 2027, and October 2027 for 2028.

5. Reporting requirements

- Quarterly verification reports, reporting on progress against the DLIs in the agreed DLI matrix for the programs (all quarters from Q1 2025 to the end of the project, submitted no later than 15 days after the end of the quarter).
- Semi-annual and Annual verification Reports: The reports will cover not just progress on agreed deliverables, but also various issues, components, disbursements, fiduciary aspects (FM and procurement), staffing (PCU), etc.
- All reports will be submitted to the PCU in at least seven hard copies and electronic format through the Program Officer.

6. Qualifications and Experience

The independent verification firm should have the following institutional capabilities and experience:

- At least five years of relevant experience in delivering technical assistance and capacity-building activities to Nigerian states to help strengthen state-level public financial management and fiscal governance. The capacity-building experience should include the following: 1) Development and dissemination of knowledge notes, templates, tools, and guidelines; 2) Customized, just-in-time advisory services for individual states; 3) Technical workshops; 4) Peer learning events; 5) Studies of state reform experiences.
- Successful experience in managing similar development programs and projects funded by development partners.
- Possess a strong organizational structure that can: 1) operate a central platform

to manage individual state requests for customized technical assistance; and 2) deploy a mobile team of experts to support the individual states.

- Has established strong relationships with states in Nigeria and has demonstrated the ability to engage with them regularly throughout the program duration to support the effective delivery of the assignment.
- Possesses efficient and prompt communication ability/skills on noticeable challenges on project implementation for immediate resolution.

Team Composition & Qualification Requirements for Key Experts

Key roles on the team (non-exhaustive)

- Program Manager: Overall management responsibility for the project.
- Project Coordinator/Capacity Building Expert: Day-to-day coordination of all project activities.
- Procurement Specialist: leads the procurement services provided by the firm for the project.
- Financial Management Specialist: responsible for financial management and reporting on the project.
- Peer Review Coordinator: coordinates all peer learning activities and exchange visits for the project and leads and coordinates the state reform experience studies.
- Senior Public Financial Management Expert: oversees the technical quality of the capacity-building services delivered to states by the mobile team of experts.
- Senior e-Procurement Expert: lead sensitization activities with the states, coordinate states interested in participating in a common e-Procurement system for states, and oversee the work of an e-procurement consulting firm, which will provide technical advisory services to states implementing e-procurement.
- Internally Generated Revenue (IGR) Expert(s) on the mobile team: provide capacity-building activities to states on IGR-related issues
- Public Financial Management Expert(s) on the mobile team: Provides capacity-building activities to states on PFM areas, including budgeting, financial statement preparation, treasury single account implementation, biometrics, and payroll management.
- Procurement Law Expert(s): provide capacity-building activities to states on developing state-level procurement legislation and frameworks.

Public Financial Management Expert(s) on the mobile team	• Minimum Master degree in Accountancy, Finance, Business Administration, Economics or other relevant fields; • Fluency in spoken English required with excellent written English skills, including sound report-writing skills. • Minimum of 5 years of relevant experience in Public Financial Management, including designing, implementing and supervising programs to strengthen PFM in the Nigerian public sector at the federal and state-level; • Knowledge of international good PFM systems, practices and standards; • Deep knowledge and experience of at least two of the following key PFM areas: • -Budget and financial statement preparation in line with IPSAS and National Chart of Accounts (NCoA). • -Capital budgeting and fiscal planning (Medium Term Sector Strategy/ Medium Term Expenditure Framework/Fiscal Strategy Paper development). • -Treasury single account implementation and cash management strategy. • -Effective biometric capturing and payroll verification methodologies including linking BVN to payroll. • -Public investment management. • Proven ability to work under pressure and meet strict deadlines;

	• Proven ability to work effectively as part of a team; • Highly computer literate with demonstrable proficiency in Microsoft Word and Excel; • Fluency in spoken English required with excellent written English skills, including sound report-writing skills.
Procurement Law Expert(s) on the mobile team	• Minimum Master degree in areas such as economics, finance, law, public administration, business administration, information technology, engineering science, or equivalent; • Excellent knowledge of procurement legislation and regulation in Nigeria; • Minimum of 5 years of relevant experience on state-level procurement frameworks, which support implementation of e-procurement and open contracting in line with the Open Contracting Data Standard (OCDS). • Proven ability to work under pressure and meet strict deadlines; • Proven ability to work effectively as part of a team; • Highly computer literate with demonstrable proficiency in Microsoft Word and Excel; • Fluency in spoken English required with excellent written English skills, including sound report-writing skills.

7. Duration of the Consultancy

The start year of the contract will be after program effectiveness, likely Q1 2019. Activities are to be completed no later than December 2022. Work plans and budgets are to be submitted for approval to the PCU on an annual basis.

8. Location

The project management firm is expected to provide suitable central office space and equipment in Abuja for the staff and consultants working on this assignment. The staff and consultants working on this assignment are expected to travel to states frequently to deliver the capacity-building activities.

9. Payment

Payments shall include the consultancy fees and reimbursable expenses associated with the performance of the project management firm's activities. The consultancy fees and schedule of payments will be discussed, agreed upon, and detailed in the contract. An initial advance will be paid after the contract is signed to mobilize activities; further payments will be made upon the delivery of the agreed activities in accordance with the provisions of the contract.

10. PCU Management

The PCU will have a dedicated specialist responsible for collaborating closely with the project management firm, as well as other agencies and partners, ensuring effective coordination of all capacity-building activities directed at the states. The Capacity-Building Specialist will assist the PCU Program Manager in overseeing and managing the project management firm.

Annex 8 - Environmental and Social Screening Checklist for Health Facility Rehabilitation

Environmental and Social Screening Checklist for Health Facility Rehabilitation

(To be completed by project implementers before approval of rehabilitation activities)

SECTION 1: GENERAL INFORMATION

1. Name of Health Facility:
2. Location (State, LGA, Community):
3. Type of Rehabilitation Activity:
 - o Minor repairs (e.g., repainting, plumbing)
 - o Moderate upgrades (e.g., roofing, flooring, electricals)
 - o Major structural work (e.g., demolition, foundation changes)
4. Estimated Project Duration:
5. Name & Contact of Implementing Agency:

SECTION 2: ENVIRONMENTAL SCREENING

A. Site Conditions

1. Is the facility located in or near a protected area, wetland, or water body? [Yes/No]
2. Is the facility in a flood-prone area or on unstable land? [Yes/No]
3. Will the rehabilitation involve removal or disposal of asbestos, lead-based paint, or other hazardous materials? [Yes/No]
4. Will the activity generate significant construction debris, dust, or air pollutants? [Yes/No]
5. Will it require excavation, leading to soil erosion or sedimentation? [Yes/No]

If “Yes” to any of the above, further assessment is required, and high-risk activities should be reconsidered or excluded.

B. Water & Sanitation

6. Will the activity affect water sources, drainage, or sanitation systems? [Yes/No]
7. Does the facility have an adequate waste management system for medical and hazardous waste? [Yes/No]
8. Will rehabilitation works affect access to clean water for the facility and surrounding community? [Yes/No]

If “Yes” to Q6-8, mitigation measures must be put in place.

SECTION 3: SOCIAL SCREENING

A. Land and Livelihoods

9. Will the activity require land acquisition or lead to displacement of people, businesses, or community structures? [Yes/No]
10. Will there be temporary or permanent disruption of access to the facility for patients or staff? [Yes/No]
11. Could rehabilitation works increase the risk of gender-based violence (GBV) or harassment due to labor influx? [Yes/No]

If “Yes” to Q9-11, the activity should be reassessed, and high-risk activities should be excluded or mitigated.

B. Occupational Health & Safety (OHS)

12. Will the rehabilitation involve working at heights, confined spaces, or exposure to hazardous materials? [Yes/No]
13. Does the contractor have a Health and Safety Plan in place for workers? [Yes/No]
14. Will the construction disrupt essential health services (e.g., emergency care, maternal health services)? [Yes/No]

If “Yes” to Q12-14, OHS measures must be strengthened.

C. Stakeholder Engagement & Grievance Redress

15. Has there been consultation with local communities, facility management, and staff about the proposed works? [Yes/No]
16. Is there a functional grievance redress mechanism in place for complaints related to construction activities? [Yes/No]

If “No” to Q15-16, stakeholder engagement must be conducted before approval.

SECTION 4: RISK CLASSIFICATION & DECISION

Low Risk (Minor repairs, no hazardous material, no displacement or major environmental risks—Proceed with mitigation measures.)

Moderate Risk (Requires additional safeguards and site-specific measures.)

Substantial/High Risk (Activities involving major construction, land acquisition, hazardous materials—EXCLUDE from project scope.)

Remarks & Recommendations: (Provide summary of risks identified and mitigation measures if required.)

Annex 9 - Annual Environmental and Social Assessment Reporting Template

(Reporting Period: (Start Date – End Date))

SECTION 1: PROJECT OVERVIEW

SECTION 2: ENVIRONMENTAL STATUS

- A. Environmental requirements
- B. Waste Management
- C. Occupational health and safety

SECTION 3: SOCIAL STATUS

- A. Land use
- A. Community Engagement
- A. Grievance Mechanism
- A. GBV Risks
- A. Inclusion of Persons with Disabilities

SECTION 4: KEY CHALLENGES AND RECOMMENDATIONS

Issues identified	Risk level (low/moderate/substantial/high)	Recommended action	Responsible Party	Deadline
e.g Inadequate waste disposal	Moderate	Improve waste segregation and disposal	Community Health Officer	Q2 20026

SECTION 5: LESSONS LEARNED AND NEXT STEPS

- A. Key Successes
- B. Major challenges
- C. Actions for next year

Annex 12 - NHIA CEmONC Empanelment Package

NHIA FINANCING ACCESS TO

COMPREHENSIVE EMERGENCY OBSTETRIC AND NEONATAL CARE

(CEmONC) Program

**NATIONAL HEALTH
INSURANCE
AUTHORITY**

Tariff schedule corresponding to each eligible package

Background

The NHIA-financing access to Comprehensive Emergency Obstetric and Neonatal Care (CEmONC) program aims to improve maternal and neonatal health outcomes by providing financial protection for women facing obstetric emergencies. As part of the implementation framework outlined in other documents, this document outlines the tariff schedule for healthcare facilities participating in the program.

Tariff Schedule

The tariff structure of the NHIA-financing access to CEmONC program includes six (6) payment components for each condition, which are bundled into one single payment. These payment components include:

- Base tariff
- Consultation
- Nursing Care
- Laboratory Services
- Medicines
- Bed stay

See details below:

Conditions	ICD-10 Code	*Cost (NGN)
Pre-eclampsia (Mild to Moderate)	O14.0	164,025.04
Pre-eclampsia (Severe Pre -eclampsia)	O14.1	255,954.94
Pre-eclampsia - HELLP (Haemolysis, Elevated Liver Enzymes and Low Platelets)	O14.2	229,406.76
Eclampsia in Pregnancy	O15.0	373,431.10
Eclampsia in Labour	O15.1	182,779.18
Eclampsia in the Puerperium	O15.2	218,308.98
Obstructed Labour	O66	235,707.74
Puerperal Sepsis	O85.0	197,119.97
Unspecified Abortion (Abortal Care)	O006	191,265.78
Antepartum Haemorrhage	O46.9	522,895.98
Post Partum Haemorrhage	O72	213,805.17
Delivery By Caesarean Section (Unspecified)	O82.9	250,078.41
Severe Birth Asphyxia	P21.0	330,281.16
Mild and Moderate Birth Asphyxia	P21.1	169,561.58
Sepsis of the Newborn	P36	228,772.06
Neonatal Jaundice	P59	318,101.16
Pre-term Delivery	O60	743,543.53

Framework For Baseline and Follow-on Facility Assessment

Project Cofitext 6fid Str6tegy

The CEmONC (Comprehensive Emergency Obstetric and Newborn Care) Project is designed to directly address maternal and newborn health challenges through a two-pronged strategy:

Continuous Quality Improvement (CQI):

- Institutionalizing clinical protocols and checklists.
- Implementing hospital collaboratives for shared learning.
- Strengthening adherence to evidence-based practices.
- Conducting maternal death reviews and using data to drive decisions.

Financial Protection Mechanisms:

- Expanding access to health insurance for pregnant women.
- Reducing out-of-pocket payments at the point of care.
- Introducing performance-based financing (PBF) to reward quality service delivery.

Tertiary and secondary hospitals serve as referral destinations, managing the most complex cases of maternal complications. Their role is pivotal in ensuring timely, high-quality emergency obstetric and newborn care (CEmONC).

The Framework: The monitoring framework outlines four key components

Quality Improvement Measures (for facilities)

to support rapid improvements in quality of care (QoC) led by facility Quality Improvement (QI) Teams and supported by regional managers and QI lead.

Performance Measures

to support leadership and key stakeholders in improving and sustaining quality care in facilities.

Implementation Milestones

to track implementation steps and progress against strategic objectives (Leadership, Action, Learning and Accountability)

Common Indicators

to provide a common set of standardized indicators for monitoring in all participating facilities and to facilitate shared learning.

The M&E framework for a CEmONC project with a quality improvement (QI) focus would leverage the Donabedian model (structure, process, and outcome) to monitor facility capacity, track key indicators, and assess the impact of QI interventions on maternal and newborn health outcomes.

Framework Overview

Donabedian Model

Structure: Assess facility infrastructure, equipment, supplies, staffing, and training.

Process: Monitor the delivery of CEmONC services, including adherence to protocols and guidelines.

Outcome: Evaluate the impact of CEmONC services on maternal and newborn health outcomes, such as mortality and morbidity rates.

Quality Improvement (QI) Integration

Data Collection: Establish a system for collecting data on structure, process, and outcome indicators, including both quantitative and qualitative data.

Data Analysis: Analyze data to identify areas for improvement and track progress.

Intervention Implementation: Implement QI interventions based on data findings, such as training, or changes in protocols.

Monitoring and Evaluation: Continuously monitor the impact of QI

Data Collection Methods

Facility Data: Regularly collect weekly, biannual data from facility M&E Teams.

MDT Quality check: Conduct quarterly reviews with MDT to assess quality of data and quality of care.

Patient Surveys: Conduct patient surveys to gather feedback on the quality of care.

Data from Facility Electronic Management Records (EMRS): Use data from EMRS to track key indicators.

Quality Improvement Activities

Training and Mentorship: Provide training and mentorship to providers on CEmONC protocols and guidelines.

Supervision: Conduct regular supervision of CEmONC facilities to ensure adherence to protocols and guidelines.

Feedback and Coaching: Provide feedback and coaching to providers on their performance.

Problem-Solving: Use data to identify problems and develop solutions.

Dissemination of Best Practices: Share best practices with other facilities.

Reporting and Communication

- Regularly report on the progress of the CEmONC project to stakeholders.
- Communicate findings to providers and other relevant actors.
- Use data to advocate for improvements in CEmONC services.

Data Collection Methods

- Facility readiness assessments
- Routine data collection at the facility
- MDT data verification – observation and supportive supervision
- Patient surveys
- Routine EMR and Data quality checks

Quality Improvement Activities

- Training, coaching, and mentorship
- Monthly QI review sessions
- Facility-led problem solving
- Best practice dissemination

Reporting and Communication

- Monthly, quarterly, and annual reporting to stakeholders
- Feedback loops for facility and district teams
- Use of data for policy advocacy and service enhancement

Outcome Level Indicators – Maternal Mortality

Maternal mortality rate: This measures the number of maternal deaths per 1,000 live births during a specific time period. A maternal death refers to the death of a woman while pregnant or within 42 days of termination of pregnancy, from any cause related to or aggravated by the pregnancy or its management, excluding accidental or incidental causes.

Formula: $MMR = \{ \text{Number of maternal deaths} \} / \{ \text{Total live births} \} * 1,000$

Numerator: Total number of maternal deaths (within pregnancy, childbirth, or 42 days postpartum).

Neonatal mortality rate: This represents the number of neonatal deaths (deaths occurring within the first 28 days of life) per 1,000 live births during a specific time period. It reflects the quality of prenatal, delivery, and postnatal care for both mothers and newborns.

Formula: $NMR = \{ \text{Number of neonatal deaths} \} / \{ \text{Total live births} \} * 1,000$

Numerator: Total number of neonatal deaths (deaths within the first 28 days of life).

Denominator: Total number of live births during the same time period.

Maternal morbidity rate: Maternal morbidity refers to any health condition related to pregnancy, childbirth, or postpartum that adversely affects the woman's physical or psychological health. The rate is the proportion of women who experience severe health complications (e.g., obstetric hemorrhage, eclampsia, infections) per a defined population of pregnant women.

Formula: $\text{Maternal Morbidity Rate} = \{ \text{Number of maternal morbidity cases} \} / \{ \text{Total number of pregnancies} \} * 1000$

Numerator: Total number of maternal morbidity cases (health complications during pregnancy, childbirth, or postpartum).

Denominator: Total number of pregnancies (live births, stillbirths, abortions).

Denominator: Total number of live births during the same time period.

Neonatal morbidity rate: This measures the number of neonates experiencing health complications such as infections, birth asphyxia, low birth weight, or jaundice per 1,000 live births. It is an important indicator of neonatal health and the quality of medical care.

Formula: Neonatal Morbidity Rate = {Number of neonatal morbidity cases} / {Total live births} * 1,000

Denominator: Total number of live births during the same time period.

Numerator: Total number of neonatal morbidity cases (health complications like infections, birth asphyxia, or low birth weight).

Denominator: Total number of live births during the same time period.

Complication/case fatality rates: This refers to the proportion of people who die from a specific complication out of the total number of cases of that complication. It's often expressed as a percentage and is used to assess the severity of health complications and the effectiveness of medical interventions.

- Obstetric Hemorrhages (excessive bleeding)
- Eclampsia
- Pre-Eclampsia
- Sepsis
- Obstructed Labour
- Abortion

Formula: Case Fatality Rate = {Number of deaths due to a specific complication} / {Number of cases of that complication} * 100

Numerator: Total number of deaths resulting from a specific complication (e.g., postpartum hemorrhage, eclampsia).

Denominator: Total number of cases of the same complication.

MEMORANDUM OF UNDERSTANDING

BETWEEN

NATIONAL HEALTH INSURANCE AUTHORITY

AND

HEALTH FACILITY

AND

TPA

This Memorandum of Understanding is made this day of2025

BETWEEN

NATIONAL HEALTH INSURANCE AUTHORITY, a Federal Government Parastatal, established by the NHIA Act, 2022, for the purpose of providing health insurance to all Nigerians and legal residents, with its corporate head office, located at Plot 297, Mafemi Crescent, Utako District Abuja, FCT (hereinafter referred to as <NHIA=) which expression shall where the context so admits include its successors-in-title, agents and assigns of the one part.

AND

NAME OF THE FACILITY, is a Federal Government Teaching Hospital established to provide specialised medical services, training of doctors, medical and allied health students and conduct medical research for the advancement of medical knowledge, located at ADDRESS OF THE FACILITY (hereinafter referred to as <**THE FACILITY**=), which expression where the context so admits include its successors in-title, agents and assigns of the second part.

AND

NAME OF TPA a duly registered Third Party Administrator (**TPA**) whose registered address isADDRESS OF THE TPA (hereinafter referred to as <**TPA**=) which expression shall where the context so admits, include its agents, successors-in-title and assigns of the last part.

WHEREAS:

- a) **NHIA** is established by the National Health Insurance Authority Act 2022, to promote, regulate and integrate all health insurance schemes in Nigeria by mobilizing and pooling resources for strategic purchasing of affordable and quality healthcare;
- b) **THE FACILITY** is established for the provision of specialised medical services, training and conduct of medical research for the advancement of medical knowledge.
- c) **THE TPA**, is an organisation with expertise and capability to administer all or a portion of the insurance claim process.
- d) **NHIA** is desirous of ending the pains of motherhood by reducing maternal mortality and morbidity.

- e) **THE FACILITY** shall serve as a primary location where the intervention will be implemented
- f) **NHIA, The Facility & The TPA** (herein jointly referred to as <the Parties=>) have hereby agreed to collaborate and streamline the activities aimed at achieving the reduction of maternal mortality and morbidity in the Facility on the terms and conditions herein set forth;

1.0 OBJECTIVES OF THE MOU

The purpose of this MOU is to specify the framework for the reduction of maternal morbidity through targeted health financing and health insurance through the National Health Insurance Authority.

2.0 DEFINITIONS AND MEANING OF TERMS

In this MoU, unless inconsistent with the context or otherwise specified, the terms and expressions herein shall be given their literal and ordinary meaning. Headings in this MoU are inserted for convenience.

3.0 NAME OF THE PROGRAMME/BENEFICIARIES

The name of the Programme shall be **NHIA – FINANCING ACCESS TO COMPREHENSIVE EMERGENCY OBSTETRIC CARE (CEmOC)** and the beneficiaries herein shall be vulnerable women with emergency Obstetric maternal complications.

4.0 DURATION OF THE INTERVENTION

The intervention shall run for a period of One (1) year effective from the date of the execution of this MoU and may be renewed in writing as agreed by the Parties.

5.0 FUNDING

- 1) Funding for the intervention shall be from various financing sources including the Vulnerable Group Fund and as captured in Section 25 of the NHIA Act, 2022.
- 2) The estimated cost of funding the intervention shall be based on NHIA's approved Fee-For-Service tariff and disbursed to the TPAs for payment to the Facility.
- 3) The fund shall cover the cost of healthcare services to the Facility for the comprehensive treatment of women with emergency obstetric maternal complications.
- 4) The cost of providing coverage under the Programme shall be paid per person as agreed by the Parties.
- 5) TPA upon receipts of premium from NHIA shall in turn pay to the Facility for services rendered.

- 6) The TPA shall be paid administrative fee of 10% (Ten percent) of the total amount disbursed to the Facility.

6.0 SCHEDULE OF PAYMENT

The Schedule of payment shall be as attached herewith and marked as **ANNEXURE 1**.

7.0 REGISTRATION

- a) Beneficiaries shall be identified by the Facility and verified by NHIA using National Identity Number (NIN) as a unique identifier for registration.
- b) Upon successful treatment, the beneficiaries shall be enrolled in the VGF/BHCPF or equivalent health insurance schemes to provide ongoing healthcare coverage and support where necessary.
- c) Facilitation of access to health care services shall be under the State Health Insurance Scheme or National Health Insurance Authority.

8.0 OBLIGATIONS OF THE PARTIES

The parties hereby agree as follows;

8.1 OBLIGATIONS OF THE NHIA

NHIA shall:

- a) Provide strategic planning and guidance for the programme.
- b) Coordinate and collaborate with all stakeholders.
- c) Ensure routine monitoring and evaluation of the implementation of the Programme
- d) Provide policy advocacy and support.
- e) Ensure payment for the comprehensive treatment of identified and registered patients.
- f) Coordinate special intervention for the treatment arising from maternal complications.
- g) Verify beneficiaries through the NIN unique identifier.
- h) Purchase health services for patients.
- i) Ensure quality assurance in the delivery of healthcare services to identified patients.
- j) Organise review meetings on the implementation of the Programme.
- k) Manage risks associated with the Programme.

8.2 OBLIGATIONS OF THE FACILITY

The Facility shall:

- a) Identify and verify beneficiaries for the purpose of registration and ensure only eligible beneficiaries participate.

- b) Ensure the provision of quality services to beneficiaries with emergency obstetric maternal complications, including family Planning services.
- c) Provide prompt and accurate data on utilization and outcomes, and other health relevant health information the programme may require
- d) Improve quality of maternal care by providing appropriate inputs (commodities, medicines, human resources) to ensure optimal outcomes
- e) Send a copy of all claims of treatments provided to the patients during the week to the TPA and NHIA State Office.
- f) Provide counselling services for patients.
- g) Participate in periodic review meetings with NHIA.
- h) Submit regular reports on the Programme implementation to NHIA.

8.3 OBLIGATIONS OF THIRD PARTY ADMINISTRATOR

The TPA shall:

- a) Set up claims validation desks to ensure prompt processing of claims.
- b) Ensure prompt verification and payment of approved NHIA Fee-For-Service or bundled payments to the Facility.
- c) Establish and maintain quality assurance system as provided for in the NHIA Operational Guidelines.
- d) Ensure accurate data management and reporting.
- e) Provide support to beneficiaries at all times.
- f) Render to the Authority monthly returns on payments within 15 days of the following month.
- g) Treat all information/records obtained in respect of the patient as confidential, except as it relates to misconduct.
- h) Refund all unexpended funds to NHIA.

9.0 BENEFIT PACKAGE

- 9.1 The Benefit package for the Programme shall aim to provide comprehensive treatment as highlighted in the Treatment Protocol as specified by the parties.

10.0 BREACH OF CONTRACT

- 10.1 The failure of the parties to comply with any of its obligation as provided herein, shall amount to a breach of this MoU.
- 10.2 The party in breach shall be notified of the breach and afforded 14 (Fourteen) days from the date of the notice, to remedy/perform the breached obligation.
- 10.3 Where any party fails to remedy the breach, the NHIA shall impose the appropriate sanction as provided in the NHIA Operational Guidelines.

11.0 TERMINATION

The Parties shall have the right to terminate this agreement by giving One (1) month notice in writing of its intention to do so. The termination of this MoU for any reason shall not relieve the parties of the accrued rights and obligations.

12.0. FORCE MAJEURE

- 12.1 The Parties shall not be liable for failure to perform its obligations under this MoU if such failure results from circumstances which could not have been contemplated and which are beyond that Party's reasonable control.
- 12.2 Notwithstanding this, the Party claiming relief shall nevertheless use all reasonable endeavors to perform its obligations as soon as practicable.

13.0 DISPUTE RESOLUTION

Parties to this MoU shall endeavor to settle amicably any differences or disputes arising between them concerning the interpretation or performance of this MoU by mutual negotiation. Where the parties fail to settle such differences or disputes amicably by mutual negotiation, then either party may serve on the other a demand for arbitration in accordance with Arbitration and Mediation Act, 2023.

14.0 INDEMNITY

- 14.1 Each Party shall indemnify and keep the other indemnified and held harmless from and against all claims, actions, demands, costs, losses, damages and expenses arising directly from any negligent act or omission on the part of the other Party, provided the indemnified Party:
 - a) Promptly notifies the other Party of details of the claim;
 - b) Does not make any admission in relation to the claim;
 - c) Allows the other Party to have the conduct of the defense or settlement of the claim;
 - d) Gives the other Party all reasonable assistance in dealing with the claim.

15.0 ASSIGNMENT

- a) No party shall assign, delegate, sub-contract or change this MoU or any part thereof, without the prior written consent of the other parties.
- b) Nothing in this MoU shall create, or be deemed to create, a partnership or the relationship of principal and agent or employer and employee between the Parties. Any such partnerships shall be set out in a separate agreement.

16.0 THIRD PARTY RIGHTS

The terms set out in this MoU are for the benefit of the Parties to this MoU and are not intended to benefit or be enforceable by anyone else.

17.0 CONFIDENTIALITY

- a) All parties agree to keep information disclosed by the other party completely confidential and shall be protected from unauthorized disclosure, use, dissemination, assignment or publication.
- b) No party shall otherwise make use of any confidential information of the other party except in connection with and consideration of the content of this MoU.
- c) Notwithstanding anything to the contrary in this MoU and for the avoidance of any doubt, the parties hereto acknowledge and agree that the parties shall be responsible for the action of their respective employees and privies
- d) All Parties shall comply with all Data Protection requirements as specified by the National Health Act 2014, the Nigeria Data Protection Act 2023, and all other relevant laws and regulations thereto.
- e) All parties shall provide the maximum protection allowed by law for the confidentiality of the information transferred pursuant to this MoU.
- f) Any information disclosed by the patients shall not be treated as a breach of confidentiality under this MoU.

18.0 NON EXCLUSIVITY

Each Party hereto acknowledges that each possesses other interests and that this MoU is a Non-Exclusive Association, relating only to the purpose herein contemplated or otherwise agreed to by the Parties in writing.

19.0 GOVERNING LAW

This MoU shall be governed by and interpreted in accordance with the laws of the Federal Republic of Nigeria.

20.0 NOTICES

- a) Any notice under this Agreement shall be in writing and shall be deemed sufficiently given when delivered to the other party at its address set forth above and duly acknowledged.
- b) Any change in address by any of the parties shall be duly communicated to the other party.

21.0 REPRESENTATION AND WARRANTY

- a. Each party represents and warrants that it is fully cognizant of the substance of this MoU and understands its role in the actualization of the intervention.
- b. Each party represents and warrants to the other that the execution and delivery of the MoU and the performance of each party's obligations herein

have been duly authorized and that the MoU is valid and legally binding on each party and enforceable in accordance with its terms.

- c. Each party represents and warrants that it will not engage in any conduct, contract or arrangement that would materially interfere with the due performance of its obligation under this MoU.

22.0 ANNEXURES

The Schedule of payment annexed to this MoU shall form part of this MoU.

23.0 ABBREVIATIONS

i). BHCPF	Basic Healthcare Provision Fund
ii). VGF	Vulnerable Group Fund
iii). NHIA	National Health Insurance Authority.
iv). NIN	National Identification Number
v). TPA	Third Party Administrator
vi).CEmOC	Comprehensive Emergency Obstetric Care

24.0 DEFINITIONS

a) Benefit Package:

A list of healthcare services defined as being within the scope of a health insurance scheme or plan.

ii) Fee-For-Service

Payment model in health insurance where health care providers are paid for each service rendered to a patient, rather than receiving a fixed payment for a specific period or population

iii) Bundled Payment

This is single payment made for a defined set of services for a defined set of people over a given period of time.

iv) Beneficiary

A person who is registered to access health care with the Centre.

v) Vulnerable Groups

Persons who due to their physical, mental or socio-economic status cannot engage in meaningful economic activity or afford basic needs.

FEDERAL MINISTRY OF HEALTH

65TH NATIONAL COUNCIL ON HEALTH (NCH) MEETING HELD AT MOHAMMAD INDIMI
CENTRE FOR DISTANCE LEARNING, UNIVERSITY OF MAIDUGURI, MAIDUGURI-
BORNO STATE, 18TH NOVEMBER – 22ND NOVEMBER, 2024

COUNCIL COMMUNIQUE

OPENING

The 65TH National Council on Health (NCH) Meeting was held at the Mohammad Indimi Centre for Distance Learning, University of Maiduguri, Borno State, from Monday 18th November to Friday 22nd November 2024. The National Council on Health, as stipulated in the National Health Act (2014), is the highest policy-making body on matters relating to health in Nigeria. The NCH membership comprises the Honourable Minister of Health as its Chairman, the Honourable Minister of State for Health, Commissioners for Health of the 36 States, and the Secretary of Health & Human Services Secretariat, Federal Capital Authority (FCT). The 65th National Council on Health was chaired by the Honourable Coordinating Minister of Health and Social Welfare, Professor Muhammad Ali Pate.

2. The theme of the 65th National Council on Health Meeting was: **"Accelerating Pathways to Universal Health Coverage: Strategies for 2030 Success"** with the following Sub-themes:

- i. "Health Workforce Development: Building Capacity for Quality Healthcare Delivery in Maternal and Child Health",
- ii. "Community Engagement and Health Promotion: Empowering Communities for Better Health" and
- iii. "Innovations in Digital Health: Transforming Healthcare Delivery".

3. A total of One Thousand One Hundred and Fifty (1150) delegates participated from the Departments, Agencies and Parastatals of the Federal Ministry of Health and Social Welfare, State Ministries of Health and the Health & Human Services Secretariat of the FCTA. Others in attendance include the members of the State House of Assembly, the leadership of ALGON, Members of the State Executive Council, representatives of the National Population Commission, the Department of State Services, and representatives of the Armed Forces and paramilitary Agencies. Also in attendance were delegates from Development Partners, Civil Society Organizations, Organized Private Sector, Health Professional Regulatory Bodies, Health Professional

Associations, Traditional Rulers and the Press. In particular, Council recognised and appreciated the Shehu of Borno for his attendance and words of encouragement to the Council.

4. Council also acknowledged the exceptional leadership of the President and Commander in Chief of the Armed Forces of Nigeria President Bola Ahmed Tinubu and commended H E, The Governor of Borno State Prof. Babagana Umara Zulum, The Commissioner for Health Borno State, the Local Organizing Council (LOC) and the good people of Borno State for their warm welcome, exceptional hospitality as well as the quality of the organisation of the 65th National Council meeting by the LOC.

TECHNICAL SESSION

5. The Council Session was preceded by two days of Technical Committee Meetings under the chairmanship of the Permanent Secretary (PSH), Federal Ministry of Health and Social Welfare, Daju, Kachollom S mni all 36 States of the Federation and the FCT participated in the Technical Session. During the Technical Session held on the 18th and 19th November 2024, there were technical presentations and panel discussions on the following sub-themes; "Health Workforce Development: Building Capacity for Quality Healthcare Delivery in Maternal and Child Health" and "Innovations in Digital Health: Transforming Healthcare Delivery". A total of Eighty-One (81) memoranda were considered; twenty-nine (29) were from the Coordinating Minister of Health and Social Welfare, Forty – Eight (48) from State Commissioners for Health of the 36 States, and the Secretary of Health & Human Services Secretariat, FCTA, while Four (4) were from other Federal MDAs (DSS and NPC). After extensive deliberations, the Technical Committee recommended 18 memoranda to Council for approval and 40 memoranda for noting. 18 memoranda were recommended to be stepped down, and 5 were withdrawn by the originators.

COUNCIL SESSION

6. The Council session was held on the 21st and 22nd November 2024 under the chairmanship of the Coordinating Minister of Health and Social Welfare, Prof. Muhammad Ali Pate. Members of the Council included Honourable Commissioners of Health of the 36 States of the Federation and FCT.

7. A welcome address was given by the Honourable Commissioner for Health, Borno State, Prof. Baba Mallam Gana, and Goodwill messages were taken from invited dignitaries and stakeholders in the health sector.

8. The opening remarks were delivered by the Honourable Minister of State for Health, Dr. Iziaq Adekunle Salako, followed by a keynote address by the Coordinating Minister of Health & Social Welfare. The 65th NCH was officially declared open by the Executive Governor of Borno State, His Excellency Professor Babagana Umara Zulum mni, while the vote of thanks was given by the Permanent Secretary, FMOH&SW Daju, Kachollom S mni, to end the official opening ceremony.

9. There were three keynote presentations, and a panel session focused on the theme and sub-themes of the meeting. These sessions provided an opportunity to discuss pertinent issues affecting the health sector.

10. Council was conducted in plenary, and based on recommendations from the technical committee, the report of the 64th NCH was adopted as amended. The status of implementation of the 64th NCH was also adopted by Council.

11. The final session of the Council meeting was the launch of the following Policy documents to be used for decision-making

- i. National Policy on Health Workforce Migration, 2024;
- ii. Nigeria Health Workforce Profile, 2022;
- iii. National Social and Behavior Change Strategy for Nutrition across the Lifecycle in Nigeria; and
- iv. RMNCAEH Documents:
 - a) National Strategy on Reproductive, Maternal, Newborn, Child, Adolescent, and Elderly Health (RMNCAEH);
 - b) Nigerian implementation Guide for the establishment of RMNCAEH+N multistakeholder Partnership Coordination platform (MSPCP) and Family Health Department at subnational level 2024;
 - c) Clinical protocol for Adolescent Health services in Nigeria, 2024;
 - d) National Guideline on Integrated Health Advocacy for Family Well-being in Nigeria;
 - e) DMPA-SC and Self Injection Expansion and Sustainability Strategy 2024-2030;
 - f) National Contraceptive Logistics Management System Guideline for Logistics Officers 2024;
 - g) National Contraceptive Logistics Management System Guideline for Service Providers 2024;
 - h) National Family Planning and Primary Health Care Service Protocol for Community Pharmacists {CPs} and Patent Proprietary Medicine Vendors {PPMVs} 2024;
 - i) National Supervisory Checklist for Family Planning and Primary Health Care Services by Community Pharmacists {CPs} and Patent Proprietary Medicine Vendors {PPMVs} 2024.

12. RESOLUTIONS

Following extensive deliberations by Council, 18 memoranda were approved, and 40 memoranda were noted.

The following resolutions were approved:

- i. The adoption and implementation of Nigeria Digital Health Initiative at the National and Subnational levels

- ii. States who are yet to institutionalize HRH Units, to identify at least two (2) competent HRH focal persons in all LGAs, health agencies, and parastatals across the 36 states and the FCT, deploy HRH focal persons in every LGA to ensure comprehensive workforce data collection, monitoring, and management; and allocate adequate resources to support its functionality, including capacity-building initiatives for HRH personnel.
- iii. The institutionalization of an award system for the top three performing States, based on the implementation review presented at the Governor's Forum meeting. A concept note to be shared with the subnational entities;
- iv. The adoption and implementation of the revised National Policy on Food Safety and Quality and its Implementation Plan, 2023 for implementation at all levels among other food safety interventions;
- v. The adoption and implementation of the first National Integrated Guidelines for Foodborne Disease Surveillance and Response, 2023 across all the States of the Federation;
- vi. The request for States to make adequate annual budgetary provisions for the sustainability of the upgraded warehouses;
- vii. The adoption of the CHEMOSAFE Policy for all cancer treatment centers in Nigeria;
- viii. The adoption of the National Policy and Strategic Plan for Hospice and Palliative Care across all levels of healthcare services and;
- ix. Support the implementation of the Policy to improve the quality of life for patients with life-threatening illnesses and their families in Nigeria;
- x. The adoption and implementation of the Climate Change Vulnerability Assessment Report and Health National Adaptation Plan (H-NAP) framework by all 36 States and the FCT;
- xi. The need for a legal framework that supports a comprehensive health sector response to epidemic drug use in Nigeria, as recommended by the WHO public health approach with centres of recovery built in line with global best practice;
- xii. The adoption and implementation of the contextualized mhGAP 3.0 by the 36 States of the Federation, FCT and implementing partners for the integration and scale up mental health services in Nigeria;
- xiii. The adoption and implementation of the revised 2024 National Policy on Infection Prevention and Control at national and sub-national levels and the allocation of necessary resources for policy execution and capacity building;
- xiv. The establishment of a sustainable model for the training programme for field epidemiologists. and allocation of resources to train Advanced, Intermediate, and Frontline field epidemiologists;
- xv. Integration of GBV within the primary health care service delivery through the incorporation of GBV care in the minimum service package and inclusion of GBV in the pre-service and in-service training curricula of primary health care workers and build community-based GBV support networks, including peer support groups, to promote awareness, attitudinal change, gender equality, and survivor support;
- xvi. The notification of States and LGAs to adopt and implement the 2022 National Task Shifting and Task Sharing (TSTS) Policy;

- xvii. Rural Emergency Services and Maternal Transport (RESMAT) scale-up implementation to cover all 36 States and the FCT, collaboration with the private sector underpinned with transparency and accountability across NEMSAS operations and service provision; collaboration with National Primary Health Care Development Agency (NPHCDA) to include the RESMAT services as part of the package to be delivered by CHWs, and collaboration with the National Digital in Health initiative for interoperability with the digitized EMS dispatch system;
- xviii. The establishment of the National Emergency Medical Service and Ambulance System as a self-accounting Agency to coordinate medical emergency and ambulance services, set standards for regulation, capacity building and resource mobilisation and the resubmission of an amended NEMSAS Bill to the National Assembly for approval and Presidential assent; and
- xix. Integration of Systems: the nationwide integration of the Vital Reg platform unto the DHIS2 as a notification system from all health facilities across Nigeria. This will enable faster and more reliable birth and death registrations in Hospitals and better services from the National Population Commission to the Health Systems.

13. CONCLUSION

- i. Council noted that Twenty-Eight (28) Honourable Commissioners for Health and the Mandate Secretary of the FCT were present at the 65th National Council meeting.
- ii. Council agreed that the 66th National Council on Health (NCH) meeting will be held in Calabar, Cross River State in 2025.
- iii. Following the presentation of the draft communique for the 65th National Council of Health by the secretary, a motion for the adoption of the communique of the 65th NCH (as amended) was moved by the Honourable Commissioner for Health, Kwara State and seconded by the Honourable Commissioner for Health, Kogi State
- iv. A motion for adjournment of the 65th NCH was moved by the Honourable Commissioner for Health Imo State, and seconded by the Honourable Commissioner for Health, Niger State.
- v. The 65th Session of the National Council on Health meeting was formally closed by the Chairman of the Council, following the vote of thanks by the Director, Health of Planning, Research & Statistics, Federal Ministry of Health & Social Welfare.

Annex 14 - NCH Memo

THIS DOCUMENT IS THE PROPERTY OF THE NATIONAL COUNCIL ON HEALTH

SECRET

NOVEMBER, 2024

NCH_65_FED_001

**MEMORANDUM OF THE COORDINATING MINISTER OF HEALTH AND SOCIAL WELFARE
ON THE IMPLEMENTATION OF THE NIGERIA DIGITAL IN HEALTH INITIATIVE AND THE
IMPACT ON HEALTH SYSTEM STRENGTHENING IN NIGERIA**

1.0 Purpose

The purpose of this memorandum is to seek council's approval for the adoption and implementation of the Nigeria Digital in Health initiative as part of the implementation of the Nigeria Health Sector Renewal Investment Initiative at the Federal Ministry of Health and Social Welfare and the ministries of health of the 36 states and the FCT.

2.0 Background:

President Bola Ahmed Tinubu GCFR envisions a Nigerian health sector that delivers an effective, sustainable healthcare system. His goal is to establish a system that saves lives, alleviates both physical and financial suffering, and ensures accessible health services for all Nigerians. This aspiration to unify all relevant stakeholders in the health sector under a shared framework has been crystallized with the signing of the Sector Wide Approach compact by both state and federal actors. Service delivery as an integral component of the health system building block remains critical in actualizing this vision. The Federal Ministry of Health & Social Welfare is committed to building an efficient, equitable, and quality health system, and digitalizing the health system and entrenching data-backed decision-making processes have been identified as core enablers for achieving this vision. It recognizes that leveraging digital technology can strengthen its health system, improve health financing, enhance public health effectiveness, and increase access to care for underserved populations.

The 58th NCH approved a resolution that the National e-Health Strategic Framework be adopted as a framework for sustained Integration of ICT in healthcare in Nigeria while the 63rd NCH approved the migration of routine health information data at primary healthcare facilities from paper to electronic. The country aims to establish a national digital health environment as a federated architecture with key components like Electronic Health Record (EHR) systems, data repositories, integrated health information exchanges, an innovation and regulatory framework for homegrown innovation, and robust governance frameworks linked to the national health insurance system towards the delivery of Universal Health Coverage (UHC) for Nigeria.

3.0 Contents

The Nigeria Digital in Health Initiative

The Federal Ministry of Health is saddled with the responsibility of formulating policies, strategies, guidelines, plans, and programs that provide direction for the national healthcare delivery system. The National Digital Health Strategy (2021-2025) details the need to have a matured digital enterprise architecture.

The Nigeria Digital In Health Initiative established in March 2024 is to create a digital health ecosystem as a positive enabler for an integrated “single source of truth” data system that is digitalized, interoperable, and accurate that creates reports to be used for decision-making through a federated Digital Health Architecture, an integrated data system that is fully digitalized, characterized by interoperability, and marked by data quality and accuracy at an optimal level centrally and trusted by all stakeholders within the health sector.

4.0 Components

i. Leadership and governance: restructuring the governance structure at the national level and technical support for setting up governance structures at the state, LGA, and health facilities;

ii. Strategy and investment: set up a digital health investment drive for fund coordination mechanisms, mobilize special-purpose digital health funds.

iii. Standards and interoperability: develop and implement an interoperable standard and digital health platform in collaboration with other relevant stakeholders, particularly on digital health standards and interoperability for the National Digital Health Platform (NDHP).

iv. Legislation policy and compliance: commence processes of aligning national digital health strategy with other existing relevant government policies and develop health sector-specific, privacy, security, and confidentiality guidelines for digital health services and applications.

v. Capacity building: assess the digital health readiness of stakeholders, define professional practice standards, develop and roll out incentive schemes for digital health adoption, develop a standard digital health-related competency framework, define new accreditation requirements, identify education and training course changes, establish a national digital health knowledge repository, develop a digital health awareness campaign strategy and roll-out, design an M&E framework for measuring the effectiveness of engagement, and design a targeted stakeholder reference and working group;

vi. Infrastructure: identify underserved areas, develop data connectivity implementation and design plan, identify and assess ongoing infrastructure projects in underserved areas in partnerships with the power and communications sector, define minimum computing, power, and connectivity infrastructure requirements for health implementation, link health organization providers’ digital health accreditation to meet minimum health facility computing infrastructure;

vii. Solutions (services and applications): identify priority services and/or applications, develop/revise requirements and design for identified services and applications, identify resources to support the expansion and development of identified services and applications, and develop/implement a collaboration portal.

The roadmap for the Nigeria Digital in Health Initiative will cover the following:

- i. Create and maintain one Health Data Space
- ii. Policies, strategy, regulations, and standards for a unified digital health ecosystem
- iii. Regulatory sandbox/approvals for health information systems and digital health interventions, within the innovation ecosystem
- iv. Create a conducive environment for private-sector providers and private-public digital partnerships
- v. Creating opportunities Digital skills and capacity building
- vi. Support the building of critical mass for digital health
- vii. Outline how states will be supported to prioritize and deploy the following in collaboration with the relevant National and state agencies: electronic health records; emergency response management (SORMAS); ambulatory services dispatch and management system; supportive supervision; QOC management, HRH/HRIS, CHW Service management, claims management, health insurance enrollment management; essential drugs and stock logistics management; and DHIS-2; and have these functions interoperable and feed into the national health data ecosystem at the federal level integrating individual private, public, and program-specific health information systems.
- viii. Public Private partnerships to leverage innovation, skills and resources.

5.0. Justification

The NDHI will facilitate the development of a full architecture blueprint in a more representative and collaborative approach. The relevant Ministry, Department and Agencies (MDAs) overseeing programs would be engaged in the process.

The Digital in Health Initiative includes EMR/HER platforms and many more. The national unified EMR platform will serve as a central hub to enhance health system efficiency, ensure robust monitoring of public health and disease outbreaks, mortality rates, facilitate seamless data exchange and quality assurance, and foster opportunities for further research to strengthen our national health security.

A national EMR system would improve healthcare quality by providing providers instant access to comprehensive patient records, leading to more accurate diagnoses and personalized treatment plans. It would also reduce health expenditure by avoiding duplication of tests and increase staff capacity and productivity by lowering paper-based administrative tasks.

6.0 Prayers

Council is invited to note that:

i. Digital in health is a foundational platform for the ongoing Nigeria Health Sector Renewal Investment Initiative and will fast track the implementation of health reforms.

ii. Digital technology and data can add immense value to health systems.

iii. Digital technology can strengthen health systems, improve health financing, make public health care more effective, and reach underserved populations.

iv. Digital technology can make health services more personal, prevent increases in healthcare costs, reduce differences in care, and make the job easier for those who provide health services. It can also enhance efficiency.

v. Digital in health allows for leveraging of the innovation and resources of the private sector

Council is further invited to consider and approve:

i. The adoption and implementation of Nigeria Digital Health Initiative at the National and Subnational levels

Coordinating Minister of State of Health and Social Welfare

November, 2024.

MEMORANDUM OF THE COORDINATING MINISTER OF HEALTH AND SOCIAL WELFARE
ON THE MATERNAL MORTALITY REDUCTION INNOVATION AND INITIATIVE (MAMII
PROJECT)

1.0 Purpose

The purpose of this memorandum is to inform Council on the Maternal Mortality Reduction Initiative (MAMII Project), An innovative initiative to reduce Maternal Mortality in Nigeria.

2.0 Background

Maternal mortality—defined as the death of a woman during her pregnancy as a result of a pregnancy-related complication—is classified among preventable deaths. The situation in Nigeria is highly concerning when it comes to maternal and newborn mortality rates, which are social indicators used to assess a nation's level of development. The vision of President Bola Ahmed Tinubu GCFR for the Nigerian health sector is to have an effective and sustainable healthcare system that saves lives, reduces physical and financial pain, and provides health for all Nigerians. Service delivery as an integral component of the health system building block remains critical in actualizing this vision. The Federal Ministry of Health & Social Welfare is committed to building an efficient, equitable, and quality health system, especially around reducing maternal and childhood mortality.

The Maternal Mortality Reduction Innovation and Initiatives (Mamii project) aims to improve the utilization of quality essential healthcare services and health system resilience in the Federal Republic of Nigeria, translating to crashing maternal and neonatal mortality. The project will strengthen the supply and demand side for essential maternal and child health care services. It will be piloted in 33 states with 172 Local Governments based on where women die and why they die. The project will run over the course of 3 years.

The MAMII project was launched during the Joint Annual Review of the Health Sector, and The Objectives of the program include:

- i. To increase facility utilization by 60% over 3 years
- ii. To increase delivery by skilled birth attendants by 60% over 3 years
- iii. To reduce maternal mortality by 30% over 3 years

2.4 The MAMMI project will adopt approaches from the supply and demand side which will achieve its objectives while integrating sustainability. Key approaches from the supply side include: Training 120,000 frontline healthcare workers, Improving PHC functionality and expanding BHCPF PHCs to 17,600. Deployment of MNH innovations (PPH bundle, Calibrated drapes, MMS etc.) and availability of responsive emergency management and referral systems including sustainable health financing. Key approaches from the demand side include involvement of the Community-based health workers (CBHW), Ward development committees (WDCs), TBA collaboration for mobilization of pregnant women to the facilities and the engagement with traditional leaders and religious leaders.

3.0 Funding

The MAMMI Project will be funded through two main streams:

- i. Investment Programme Financing (IPF) component of HOPE PHC, and BMGF funding – Procurement of commodities (MAMA starter pack), training logistics
- ii. BHCPF – payment of CBHW (JCHEW and Auxiliary CHW), support town hall meetings, monthly WDC meetings, transport for outreaches and emergency referrals

4.0 Sustainability Plan

The following are built into the project to ensure sustainability

- i. Legislative framework that will ensure the program is given legislative backing to ensure sustainability
- ii. The community will safeguard the program by advocating for its continuation with future government
- iii. Empowerment program for Traditional Birth Attendants (TBAs) as an alternative livelihood pathway after transitioning out of their role.

5.0 Prayer

Council is invited to note that:

- i. The MAMMI project is an innovative initiative to reduce Maternal Mortality in Nigeria
- ii. The Project was unveiled during the Joint Annual Review Meeting and will be implemented in 33 states within LGAs with Maternal Mortality above 1000 per 100,000 live births.
- iii. The project will be funded through multiple streams, including the IPF component of the World Bank HOPE – PHC program, BHCPF and BMGF

STATES AND THE FCT

1.0 Purpose

1.1 The purpose of this memorandum is to seek Council's approval for the adoption and implementation of the Climate Change Vulnerability Assessment (VA) and Health- National Adaptation Plan (H-NAP) framework by the 36 States and the FCT.

2.0 Background

2.1 Nigeria is one of the most climate-vulnerable countries in Africa, with UNICEF ranking it second on the list of top countries where children face climate-related risk. Under continued high emissions scenarios, WHO predicts massive impacts on Nigerian life expectancy and productivity through increasing risk related to diarrhea illness flooding, heat waves, communicable disease outbreaks, and access to water and nutrition. Health systems are a key protective factor in the face of increasing climate change-related risks. However, health systems themselves are also very vulnerable to the impacts of climate change and may be compromised when they are needed most, affecting the ability to continue to provide basic essential public health services and to respond to climate- related public health crises.

2.2 In view of the above, the Federal Ministry of Health Social and Welfare (FMOH&SW) conducted a Vulnerability Assessment (VA) and is recently in the process of developing a Health-National Adaptation Plan (H-NAP) to address critical health vulnerabilities and strengthening resilience in the face of health risks. It also helps in understanding health system gaps and the requirements of vulnerable populations in the country. The assessment provides a comprehensive framework for state-level adaptation that aligns with national objectives. It provides critical insights and frameworks essential for developing targeted health interventions,

2.3 Nigeria has an increasing burden of diseases, most of which are climate-sensitive (WHO, 2016). Some of these diseases are zoonoses. Moderating influences include non-climate factors such as population growth and demographic change, standard of living, access to healthcare, improvement in health services and public health infrastructure.

3.0 Justification

To fully benefit from the waves of financial support from the World Bank and improve health outcomes, this memo seeks the council's approval for states to formally adopt

the VA and H-NAP framework. By doing so, states will position themselves strategically to benefit from the ongoing wave of financial support provided by the World Bank. This funding, sourced through the Disbursement Linked Indicator (DLI) 10 under the HOPE- PHC project, offers financial incentives for states and the federal government, aimed at advancing healthcare resilience and improving preparedness.

We humbly request the council endorsement to proceed with these adaptation initiatives

4.0 PRAYER

Council invited to approve:

i. The adoption and implementation of the Climate Change Vulnerability Assessment (VA) and Health-National Adaptation Plan (H-NAP) framework by the 36 States and the FCT.

Honourable Coordinating Minister of Health and Social Welfare

November 2024

MEMORANDUM OF THE HONOURABLE MINISTER OF HEALTH ON THE SCALE UP OF THE RURAL EMERGENCY AND MATERNAL TRANSPORT OPERATIONS UNDER NATIONAL EMERGENCY MEDICAL SERVICES AND AMBULANCE SYSTEM (NEMSAS) PROGRAMME ACROSS THE FEDERATION

1.0 Purpose

1.1 The purpose of this memorandum is to seek Council's approval to scale up the implementation of the rural emergency services and maternal transport in all states of the Federation and the FCT under NEMSAS programme in a bid to reduce maternal and newborn mortality in Nigeria.

2.0 Introduction:

2.1 The Nigeria Health Sector Renewal Investment Initiative, is an ambitious and transformative initiative launched in December 2023 by Mr President with a view of improving Nigeria's health outcomes and economic potential by drastically reducing maternal and under-five mortality rates. This reform agenda is underpinned by a Sector Wide Approach and supports Nigeria's Universal Health Coverage aspirations. The National Emergency Medical Services and Ambulances System (NEMSAS) is an integral pillar of the NHSRII; it will create and strengthen existing Rural EMS in rural and hard to reach localities in Nigeria. This localized EMS system will approve services within a defined area, utilizing resources located within that same locality.

2.2 This Rural EMS services is prioritized for localities that with limited NEMSAS coverage due to geographical or logistical challenges. Therefore, a community will be supported to identify vehicles suitable to their terrain, that are proximal to the defined community. Riverine areas may use boat ambulances, densely populated areas may use various forms of two- and three- wheeled vehicles that can traverse narrow or unpaved streets. These services may also use local phone number stationed at the health facility, instead of the national 112 emergency number. Upon accreditation by NEMSAS such platforms will be empaneled for reimbursements.

2.3 The Rural EMS (RESMAT) is made of the following components, which are aligned with the overall NEMSAS objective.

i. Regulatory, Governance, and operational Management:

The Rural EMS will build capacity in operation and management at all process levels, including the areas of human resources development management and evidence-based decision-making.

ii. Advocacy and behavioral change communication (BCC) on effective use of EMS system: The rural EMS will ensure that the community members are well informed and encourage to use the EMS system primarily for medical emergency when such cases arise.

iii. Quality Monitoring and Analytics: The Rural EMS will build capacity and use analytical tools to capture and exploit EMS- related data for operational use.

iv. Dispatch, Communication, and Information System: The Rural EMS will use GSM telephone infrastructure to communicate with community members, leveraging on the existing arrangements.

v. Training and Skills Improvement: The Rural EMS will develop and implement strategies to ensure that pre-hospital care personnel possess the skills needed to operate in an emergency care environment.

vi. Community demand and generation: The Rural EMS will partner with the NPHCDA to identify Community Health Workers (CHWs) who are equipped to support beneficiaries identify EMS service delivery providers in the catchment areas. The support to the RESMAT will be part of the package of services to be delivered by the CHWs.

vii. Quality of services: Referral services will be guaranteed to accredited BEMONC and CEMONC facilities within a stipulated time from the call of the ambulance service.

3.0 Issues Raised/Justification

3.1 RESMAT has been identified as key to addressing the burden of mortality, morbidity and disability from medical emergencies in Nigeria which remain high despite significant investments by successive governments. Medical treatment at point of care in emergencies, along with ambulance transport, are long overdue public services to citizens in Nigeria and recognized as essential to address various life-threatening health conditions that occur in rural communities. A unique NEMSAS/RESMAT feature is the pooling of assets and resources from the public and private health sectors to cost efficiently operate emergency service as a fee-for-service, remunerated Public Service.

3.2 This proposal to enhance the utilization of quick and prompt EMS, referral, and transport of complicated deliveries in community PHCs and BEmONC facilities requiring CEmONC care and advanced neonatal resuscitation for newborns is predicated on a recently concluded stakeholders' engagement and assessment of rural emergency and maternal transport in 15 states of the federation by NEMSAS which showed that maternal and perinatal mortalities are very high with an alarming rate. Increasing the utilization of EMS among pregnant women and newborns is crucial, as delays in accessing appropriate healthcare in the case of pregnancy complications and poorly managed deliveries have been linked to high maternal mortality.

3.3 It will also facilitate the scale-up of a digitally enabled ambulatory health service to improve sustainability and dispatch times for ambulatory health services more generally.

3.4 This emergency medical service and ambulance system will be operationalized by bringing together hospital and ambulance assets from both public, private, and other institutional sectors in a unique PPP initiative as a government financed programme but implemented through a unique private sector approach. These types of service delivery innovations aim to expand the coverage and quality of services with an emphasis on underserved rural populations and poor & vulnerable beneficiaries.

3.5 The implementation of the RESMAT will guarantee reimbursements for the verified transfer of beneficiaries with obstetric and neonatal complications who are transported to Tier 2 (PHC BEmONC) facility or empaneled CEmONC facilities using the digitized EMS dispatch system.

3.6 This initiative is a critical complement to the recently launched Maternal Mortality Reduction Innovation Initiative {MAMII} by supporting not only private sector innovations aimed at increasing utilization and quality of maternal and child health interventions, but also providing an avenue to test new approaches to scale up interventions required for ending preventable maternal, newborn, and infant deaths.

4.0 Prayers:

Council is invited to approve:

- i. RESMAT scale up implementation to cover all 36 states and FCT.
- ii. The collaboration with private sector underpinned with transparency and accountability across the gamut of NEMSAS operations and service provision.
- iii. Collaboration with NPHCDA to include the RESMAT services as part of the package to be delivered by CHWs.
- iv. Collaboration with National Digital in Health initiative for interoperability with the digitized EMS dispatch system.

Coordinating Minister of Health and Social Welfare

November, 2024.

Annex 15 - MNCH Products to Achieve DLRs

Introduction

Nigeria faces significant challenges in achieving key maternal, neonatal, and child health indicators, all of which depend on commodity availability. Maternal mortality requires a 15-fold reduction to meet global targets, with Nigeria currently accounting for over 20% of worldwide maternal deaths. Neonatal and under-five mortality rates require a five-fold improvement but are instead stagnating or regressing. Access to modern contraceptive and reproductive health methods remains low, with only 15% of married women utilizing them. Additionally, health services in Nigeria are largely financed through out-of-pocket expenditure, requiring a sector-wide public-private response to improve financial protection and equitable access. Access to essential medicines is fundamental to achieving universal health coverage and is a cornerstone of a robust health system.

Nigeria - Primary Healthcare Provision Strengthening (HOPE-PHC) Program through its focus on strengthening the primary healthcare system to deliver good-quality essential health services and improve resilience, by building on the government's primary healthcare reform agenda to address a series of interrelated challenges: (a) on the supply side, poor quality of care with particular attention to weaknesses in facility readiness, commodity availability, and supply chain management; (b) on the demand side, limited demand for and utilization of essential services with considerable inequities, due in part to weaknesses in the community-based health workforce; and (c) the climate change and health emergencies as key risk multipliers. This is IDA Credit - 500.00 million and a GFF Grant – 70.01 million USD

HOPE-PHC Program will disburse based on the achievement of eleven DLIs identified and pre-agreed with the FMO and its partners. A key related DLI is

DLI 2: Increased availability of essential commodities

- DLR 2.1: Federal expenditure on quality family planning commodities increased (percentage)
- DLR 2.2: Frontline availability of tracer

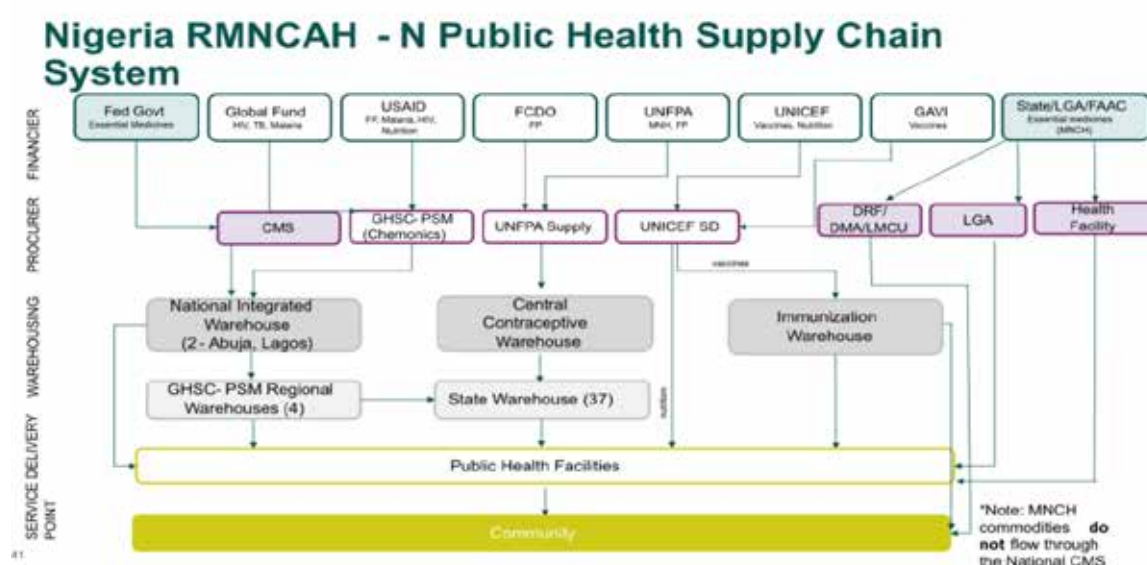

Supply Chain System - Logistics Management Coordination Units (LMCU)

Over the years, key stakeholders—including but not limited to those involved in the supply chain—have increasingly recognized the urgent need to strengthen pharmaceutical and health product management in the country. Despite these efforts, several persistent challenges continue to impede equitable access to healthcare.

These challenges include recurring stock-outs of essential medicines in some health facilities, while others face issues with overstocking and expiry of products. Warehousing

and distribution systems often fall short of minimum standards, and there is limited visibility in reporting across various disease programs. Furthermore, basic logistics management information systems are lacking in many areas. Significant efforts have been made to integrate parallel distribution and data channels, with the most substantial progress seen in PEPFAR-supported states and programs. In contrast, family planning (FP) services remain relatively fragmented in states not receiving aid, where paper-based reporting systems are still common.

The presence of multiple, often poorly coordinated, supply chains by government and development partners — set up with the intention of meeting urgent health product needs—has led to further complications. These fragmented systems have introduced inefficiencies due to inadequate coordination, integration, and harmonization. As a result, duplication of efforts and activities within supply chains is common, undermining the overall effectiveness and resilience of the healthcare system.

The WHO STAGE WG developed and agreed upon draft assessment criteria with three dimensions: (i) burden, determinants and knowledge (including effectiveness or impact); (ii) acceptability and equity; and (iii) feasibility (including accessibility and cost).

RMNCAH (Reproductive, Maternal, Newborn, Child and Adolescent Health) commodities, based on the WHO stage, are essential for providing quality care and reducing preventable deaths. These commodities are categorized to target specific health needs throughout the lifecycle, from pre-pregnancy to adolescence.

Key RMNCAH Commodities by WHO Stage:

I. Reproductive Health: Includes family planning/contraception, STI prevention and treatment, and maternal health services like antenatal care.

II. Maternal Health: Focuses on antenatal, intrapartum, and postpartum care, including essential drugs and supplies for safe delivery.

III. Newborn Health: Includes essential newborn care supplies, such as resuscitation

equipment and supplies for preventing neonatal infections.

IV. Child Health: Covers vaccinations, treatment for common childhood illnesses, and nutrition support.

V. Adolescent Health: Addresses reproductive health, sexual health, mental health, and nutrition needs of adolescents.

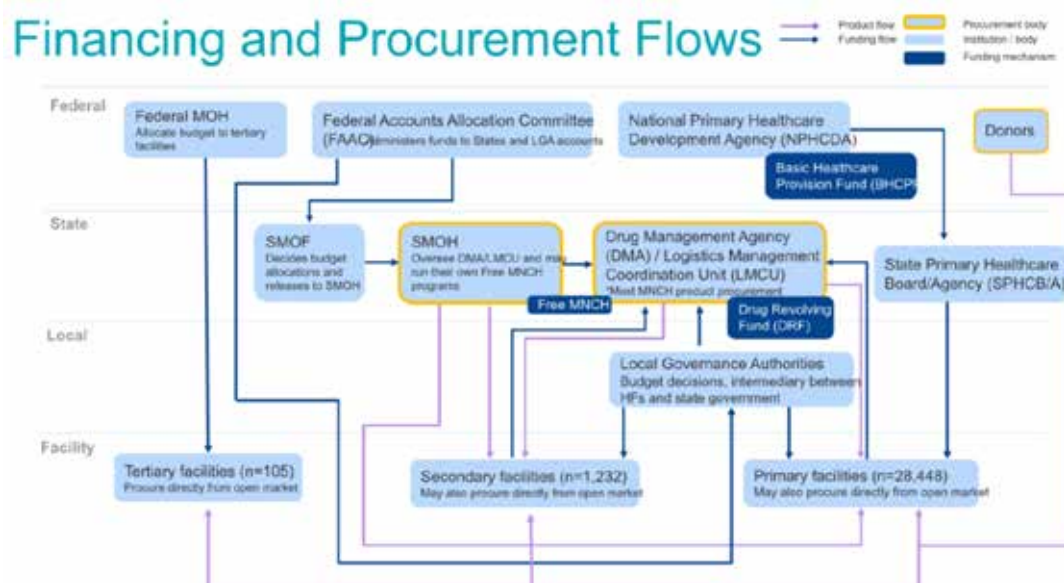

The MNCH commodities and enablers prioritized based on the WHO MNCH commodities, UNFPA, FMOH (DFH) and NPHCDA are listed below to provide life-saving products to prevent and treat leading causes of mortality and morbidity.

Reproductive Health	Maternal Health	Newborn + Child Health
Family Planning • Copper IUDs • Hormonal IUDs • Implants • DMPA-SC • DMPA-IM • Levonorgestrel/Ethinyl Estradiol • Condoms – male and female • Emergency contraception Post Abortion Care • Misoprostol • Mifepristone	Labour, Induction, Rx of PPH • Oxytocin • HS Carbetocin • Tranexamic acid Maternal Prophylaxis • Sulfadoxine + Pyrimethamine • Tetanus Toxoid Maternal Supplements • Ferrous Sulphate / Folic Acid • UNIMMAP MMS Anti hypertensives • Methyldopa • Labetalol • Hydralazine • Nifedipine Pre/Eclampsia Mn+Rx • Magnesium Sulphate • Diazepam • Aspirin 75mg Antibiotics • Metronidazole • Azithromycin • Amoxicillin/Clavulanic • Ceftriaxone Anti Malaria • Artemisinin-based Combination Therapy (ACTs)	Immediate Care • Vitamin K1 • Caffeine Citrate • Chlorhexidine Digluconate Steroids • Dexamethasone/ Betamethasone Antibiotics • Ampicillin • Ceftriaxone • Gentamicin • Amoxicillin Nutrition • Zinc ORS • Zinc sulphate • Albendazole • RUTF • SQ-LNS Prophylaxis • Pentavalent Vaccine

Enablers/Equipment		
HIV rapid test kits	• HIV rapid test kits • Calibrated Drapes • Non—pneumatic anti shock garment • PPH trolley • Equipment for assisted delivery	• Self-inflating bag with mask • Oxygen • Suction device • Pulse oximeter
* In bold and red are the tracer commodities for the HOPE PHC program.		

Financing of Commodities

Financing for MNCH commodities is managed through state-level procurement processes led by individual state governments. However, inequitable access to these commodities results in unpredictable funding and, in many cases, inflated prices for substandard products. Despite significant variations in maternal and neonatal mortality rates (MMR and NMR) across states, funding allocations for MNCH-N products remain largely uniform, suggesting that financial decisions are not aligned with the actual burden of need.

Opportunities

The pharmaceutical sector in Nigeria has seen growth, but challenges such as reliance on imported inputs and regulatory inefficiencies hinder expansion. Recent government initiatives aim to boost local production. Opportunities for Local Manufacturing of MNCH Commodities in Nigeria will provide access to a huge market for sub-Saharan Africa. This will enable the country to (i) improve quality; (ii) reduce dependency; (iii) availability of the products; (iv) drive the local economy; and (v) sustainability and health systems strengthening. PVAC is a strategic government initiative designed to transform Nigeria's healthcare ecosystem and position the country as a global hub for the manufacturing of health products and technologies.
